

# AUDI TT FROM 07/2006

## DASHBOARD PHOTO:

## REQUIRED CABLE(S): C44 + A5 + C1

## FOLLOW THIS INSTRUCTION STEP BY STEP

1. Remove dashboard and open it completely. Separate boards from dashboard.
2. Connect power connector (blue 32 pin). Use [PHOTO 1](#).
3. Connect yellow wire from cable C44. Use [PHOTO 2](#).
4. Remove resistor marked on [PHOTO 2](#) and keep it to install it back later .
5. Lift up PIN from crystal resonator. Solder white wire from coaxial cable to pad on PCB where crystal pin was connected before. **Do not connect this cable to crystal resonator pin.** Use [PHOTO 3](#).
6. Solder red, green, black, white, blue wires from C44 cable. Use [PHOTO 3](#).
7. Now connect C44 cable to A5 adapter and connect A5 adapter to Enigma. **Do not connect C44 cable directly to Enigma!**
8. Please select in menu AUDI->A3->xxxxx and press button START.
9. Press READ KEY button and then OK button. If everything is connected correctly Enigma should read security access key from Micronas microprocessor and allow you to save this key into a file. Please save the file and remember the file name.
10. Unsolder all wires from PCB, install removed resistor and solder back lifted up pin from crystal resonator to PCB. Mount back dashboard and install it into the car.
11. Connect OBD2 cable to car and Enigma and start the same program again.
12. Press READ KEY button and then press CANCEL button. Enigma will ask you to open key file that you previously saved. Please open this saved file.
13. Now you can use functions: READ KM, CHANGE KM, READ and WRITE EEP as you need.
