

ENIGMA USER MANUAL
BMW CAS 3/CAS3+

CAS 3 PHOTO:

REQUIRED ADAPTER(s):

THERE ARE FEW SIMPLE RULES TO MAKE THE JOB DONE:

1. To read value from **CAS3** the dash must be connected.
If the dash is not connected your machine is not able to read value.
2. To change value in **CAS3** first you have to disconnect the dash and change Eeprom memory value.
3. Normally in cars from **2006 to 2008** you should use **K-LINE** program with **A3** adapter and **C1** cable.

Normally in cars from **2008** and up you should use **CANBUS** program with **C1** cable.

4. If your machine tells you that there is no communication might be a **CAS2** or unknown software version and you will have to use different program.

ENIGMA USER MANUAL
BMW CAS 3/CAS3+

STEP BY STEP INSTRUCTION:

STEP 1: Before you do anything just connect Enigma to the OBD2 and try to read the value. If you see that the value is correct remember which program did you use and disconnect your machine. Take out the dash and change Eeprom memory value.

STEP 2: Connect your machine and start the **CAS3** program again and click **CHANGE KM** – menu will appear.

REMEMBER THAT STEP1 IS ALREADY COMPLETED!

STEP 3: Insert the key but **DON'T TURN ON THE IGNITION!**

STEP 4: Remove the key.

STEP 5: Connect the dash. You have limited time to do it.

STEP 6: Wait until the machine finishes to program.

STEP 7: You can disconnect your machine from the car and check if the change is correct.
