DELETED

ACTIA Multi-Di@g 01.2011 (v22.03.0218)

1.38GB

Ideal for the independent garage wanting a truly multi-make diagnostic tool giving in-depth diagnostics on a wide range of European-manufactured cars. The Access kit is Windows-based, and can connect to any Windows PC or laptop with a USB port (subject to minimum specification). Direct access to all diagnostics features. With Multi-Diag, you don't have to be an electronics expert. All features are just a few mouse clicks away via the intuitive, user-friendly interface.

Multi-Diag guides the operator step by step through the job ahead :servicing, wheels and suspension, brakes, air conditioning, anti-pollution, car body, and engine. The workshop mode lets you perform bull's-eye diagnostics every time. An expert mode providing advanced ECU diagnostics, physical measurements and configuration capabilities is also available. As soon as you connect the OBD plug, Multi-Diag automatically identifies the vehicle- (no more manual data entry). Then, a mouse click takes you straight to the diagnostics page matching the make and model of the vehicle.

- Available on vehicles fitted with an EOBD socket. **BTN_express_diag**The Express Diag feature and Diagnostics Report

The Express Diag feature lets you run a comprehensive test across all ECUs in the vehicle in just 1 click. This feature lets you check the vehicle's electronic status in a few minutes and then prints out a Diagnostics Report. This Diagnostics Report is automatically customisable with your workshop name and details, lists the ECUs tested and gives a detailed rundown of ALL errors identified.

ATRIS Stahlgruber + Technik 4.2010

16.25GB

ATRIS Stahlgruber provides information on spare parts of cars and trucks. Data on passenger cars from 60's, on the cargo from the 80's. Since 2002, the program is executed in the shell of TCD and using data from TCD, except for information on spare parts in the program integrates information about the norm-hours, fuel tanks, maintenance intervals, timing belts installation labels and identification plates. This program contains cross-reference and warehouse facilities STAHLGRUBER, + wholesale price for downloading a file Artikel.dat otherwise complete analogy TCD. There is a search for the original number, the number Stahlgruber, you can see the list of applicability of the details, select a car on the engine, including filtering by brand or manufacturer, also contains illustrations and photographs of many parts. Program ATRIS Stahlgruber comes on 3 DVD, can be installed in several versions, from minimum to maximum + network.

When the installation asks for the primary customer number Stahlgruber of 6 tsifr. Vvodim any number of the attached file and work peacefully. To get rid of the date, after installation run the attached registry file.

If no password is needed apdeyte automatically updated itself. In comparison with the TCD has less cross - correspondingly smaller errors.

DELETED

Audi Flash DVD 6.2011

3.58GB

On this DVD you will find the latest data records for reprogramming control units on various car models. These data records (data containers) are repair solutions for use in case of customer complaint. The Technical Service Handbook already refers to this DVD and to the reprogramming process for certain problem solutions. After having received the latest updated DVD for software adaptation of control units, please dispose older outdated discs according to the customary defaults .

BMW ETK Electronic Spare Parts Catalogue contain full information about original spare parts for cars (from 1932 year) and motorcycles (from 1948 year) and also helps you to find parts more quickly, easily and safely. Moreover, it is no longer necessary to search in different microfilms and lists, because you are provided with extensive information.

The function of PARTS SEARCH lead you through the search process, from vehicle identification through the actual parts search to the diagrams and the parts list which you use to assemble the parts for your order.

Before searching for a part, you must identify the vehicle for which the part is intended. This limits the selection of possible parts to that particular vehicle. Generally, the vehicle is identified by entering the CHASSIS NUMBER. The last 7 digits of the chassis number recorded on the registration are used for this. If the chassis number is unknown, the VEHICLE DATA can be entered instead. You make your selections in series from left to right.

Program occupies one DVD, support only full installation on HDD and require 1.2Gb of free space. For interface available too many languages.

Description:

BMW ETK contains the full range of parts offered for sale by the BMW Group and is intended to facilitate the retrieval of necessary spare parts (automobile and motorcycle parts), equipment and accessories. To do this at your disposal a variety of search features, such as searching by name, by part number, etc. In addition, the system offers detailed information on specific details, as well as the ability to create so-called parts list of found parts .

BMW GT1 v44, v57

1.21 GB

BMW GT1 Group Test One Diagnostic

GT1 can complete coverage of ALL BMW systems,one thing that can only be done using the GT1, this function is called Electronic Control Unit (ECU) programming and configuration.

Features:

GT1 can complete coverage of ALL BMW systems,one thing that can only be done using the GT1, this function is called Electronic Control Unit (ECU) programming and configuration. Many of the original electronic systems on modern vehicles can now be re programmed using software; historically any changes to rectify software problems would involve a new ECU which would be purchased from the parts department and that is the only way that the independent market today is able to overcome these problems. The BMW GT1 system allows you re programme all BMW car ECU??s to fix software or to install a blank ECU to a repaired vehicle. GT1 is the only system that allows you to do this and is absolutely essential if working on Freelander,the GT1 is also the only system that provides all diagnostics and programming for the very latest BMW launched this year.

BMW Inpa - Ediabas + DIS Multilingual

8.44GB

Engineering Complex BMW Inpa / Ediabas until recently used by the staff of all departments and branches of the BMW to develop, debug, and test electronic control units produced by the concern of all vehicles.

Year: 2006

Version: 2006
Language: Multilingual

System requirements:

Operating system Windows @ 98/2000 / XP / VISTA (in compatibility mode for XP) / Win7 (in compatibility mode for XP);
Processor Intel Pentium-II @ 300MHz or equivalent;
The amount of RAM to 64MB;
Free hard disk space 400 MB;
COM-port or USB-port (depending on the version of the adapter).

In addition to the engineering functions of the complex also has a comprehensive diagnostic capabilities. Thanks to its original purpose scanner provides access to any vehicle ECU. Functions for reading the real-time parameters and test actuators can verify the correctness of any control, whether it be a button or a potentiometer. If desired, you can track the position of each damper climate control unit, or adjust the volume using the radio is connected through the diagnostic socket of a PC.

The software complex has a modular design consisting of a diagnostic module interface (connects vehicle and scanner), module coding, network module (allows you to run diagnostics from a remote computer on the LAN), an emulator of the individual control units, interpreter and compiler diagnostic scripts. The latter function is particularly interesting because it allows you to perform as a ready-made diagnostic algorithms, and create your own. Despite the complexity of the software system it was very detailed documented. However most of the descriptions drawn up in German. Diagnostic

Interface Language - English or German.

Unlike previous versions of Inpa / Ediabas v5.0, as well as subsequent versions (5.0.2 and others) - a full 32-bit applications Windows, no problems running under Win98, NT and XP, as well as VISTA and Win7 (in compatibility mode for XP).

The list of cars that are supported by the interface OBD: E36 (some), E38, E39, E46, E52, E53, E60, E65, E83, E85, E87,

E90, Mini R50, Rolls Royce RR1

The list of cars that are supported by the interface ADS: E31, E32, E34, E36

The list of cars that are supported by an interface D-Can: E60, E61 from 03/2007; E83 from 09/2006; E81, E87 from 03/2007; E90, E91, E92, E93 from 03/2007; E70/E71; R56

The list of supported ECU: All the BMW unreleased until now (our cards can work with INPA BMW F-Series - contact us to set up).

The functionality of the device:

Identification of the parameters of the ECU;

Read fault codes;

Removing trouble codes;

Read the real-time parameters;

Reading the contents of the memory control unit;

Monitoring compliance with codes, VIN and mileage in the memory of various ECM;

Coding of ECU;

Activation of the actuators;

Emulation of the various control units;

Activation / deactivation of engineering functions.

When using the scanner must be careful. The program contains special features and engineering regimes, such as preservation of various ECM to reduce power consumption for long-term parking lot. If you accidentally activate this feature most of the car electronics will go into "deep sleep" and you have to spend a lot of time for their re-activation. A thoughtless use of an interpreter when you create your own diagnostic algorithm in general can lead to unpredictable consequences.

BMW SSS v41

12.25GB

BMW PROGMAN version 32 program disks 1 & 2 used for adjusting your BMW Factory ECU without the dealer from a laptop. Requires specialized cable for either OBDI or OBDII cars.

PROGMAN is a BMW software based system designed to reside on a specific set of hardware configuration (SSS or SSSr2) that will allow software updates to up to five cars at a time. It will update the ENTIRE vehicle (over 25 different defined sub-systems in each BMW) not just one area such as DME/ECU. It requires special BMW supplied connectors and connectivity to perform this function although standard ports (OBD II) are allowed but not the most efficient.

The PROGMAN, formerly known as CIP (Programming, Coding and Individualization), updates are distributed to dealers in DVD form for major changes and those major changes can have several minor updates distributed via BMW' online system. Even now many dealers and owners are confused by the use of PROGMAN and / or CIP references but neither really tells you what software you have. That really is defined by the Target Data Status (TDS) which nails down the vehicle series, month/year and level of the actual installed software on a BMW.

Now to add to this already confused state comes ISTA/P. ISTA/P is the new programming tool designed to replace PROGMAN. And it will have new numbering convention.

EurotaxEgis 2 1.7 05.2012

8.62GB

Egis is the comprehensive database for repair and service businesses across Europe with unique selling propositions.

The Benefits:

Egis contains technical adjustment and maintenance data, labour times with overlap logic and repair instructions covering over 60 vehicle manufacturers and importers, and over 340,000 vehicle types (passenger cars, SUV, LCV).

The assembled information can be set to national vehicle search trees and is available in 17 countries and 13 languages. This makes Egis the leading data source for repair and service information.

The technical information is primarily derived directly from manufacturers and importers and enhanced by skilled Eurotax editors.

Egis modules:

Egis database contains several information modules that can be purchased individually or as a complete package:

- Labour time calculations with overlap logic
- Service and maintenance with intervals, labour times, maintenance plans and technical information
- Technical repair and adjustment
- Technical repair instructions

Egis delivery via DVD

The Egis offline PC product is a very useful tool for end-users because it:

- Provides easy access to relevant information
- Has a clear design and user-friendly format
- Works with a vehicle independent terminology

Egis delivered as raw data

Raw data delivery is a very helpful format for all organisations offering their own applications such as vehicle spare part catalogues. With EurotaxEgis these added values can be realised:

- Offer repair calculation by linking vehicle parts to labour time values and overlap time calculation
- Offer technical repair information (direct link to spare parts)
- Enable a continuous workflow from the spare part to the repair code and vice versa (linking between all relevant tables)

Ford/Mazda IDS 70

3.7 GB

The Vehicle Communication Module (VCM) is a high performance, ruggedized, vehicle serial communications gateway. This device provides multiple vehicle serial communication interfaces to meet the requirements of all Ford Motor Company vehicles.

The VCM unit is housed in a magnesium enclosure with a tough, protective, plastic cover for the PCMCIA expansion slot which can, for example, be used for wireless LAN cards or memory expansion. The VCM device contains five LED status indicators to provide the user with a visual mode of internal VCM, vehicle, and host device (e.g. NGS Classic's T-Handle, PC, Pocket PC/PDS, and Laptop/IDS) operation.

The VCM also has detachable cables for connection to industry standard high-speed host interfaces as well as to the vehicle under test. The VCM 2007.7 DVD includes both IDS (Integrated Diagnostic Software) and PDS (Portable Diagnostic Software) tools.

Product contents:

- VCM
- PDS
- Cables
- Case

Application Overview:

Integrated Diagnostic Software (IDS) is the next generation diagnostic tool. IDS integrates WDS software modified to run on an off-the-shelf laptop with the Vehicle Communication Module (VCM) currently used in NGS+ and PDS, and a new Vehicle Measurement Module (VMM) .

Vehicle Diagnostic Connectors:

The VCM 16-pin DLC cable is used to connect the VCM to the vehicle. The VCM and VMM connect to the laptop through the Ethernet-USB Adapter Cable (H406/H416) .

Ford VCM IDS v73 v126

Ford VCM IDS (VCM) is a high performance, rugged, vehicle serial communications gateway

Newest version:

IDS: V73

Jaguar & Land Rover: V126

Languages: English, German, French, Italian, Spanish, Netherlands, Swedish, Danish, Norwegian, Portuguese, Slovak

New Ford Rotunda Dealer IDS VCM V73

Ford VCM IDS (VCM) is a high performance, rugged, vehicle serial communications gateway. This device provides multiple vehicle serial communication interfaces to meet the requirements of all Ford Motor Company vehicles. The VCM unit is housed in a magnesium enclosure with a tough, protective, plastic cover for the PCMCIA expansion slot which can, for example, be used for wireless LAN cards or memory expansion. The VCM device contains five LED status indicators to provide the user with a visual mode of internal VCM, vehicle, and host device (e.g. NGS Classic's T-Handle, PC, Pocket PC/PDS, and Laptop/IDS) operation.

The VCM also has detachable cables for connection to industry standard high-speed host interfaces as well as to the vehicle under test. The VCM DVD includes both IDS (Integrated Diagnostic Software) and PDS (Portable Diagnostic Software) tools. Diagnostic coverage includes most 1996 2008 MY (produced 1995 2007) Ford, Lincoln/Mercury & Mazda vehicles.

Specification:

1. Application Overview

Integrated Diagnostic Software (IDS) is the next generation diagnostic tool. IDS integrates WDS software modified to run on an off-the-shelf laptop with the Vehicle Communication Module (VCM) currently used in NGS+ and PDS, and a new Vehicle Measurement Module (VMM).

2. Vehicle Diagnostic Connectors

The VCM 16-pin DLC cable is used to connect the VCM to the vehicle. The VCM and VMM connect to the laptop through the internet-USB Adapter Cable (H406/H416).

3. Interface Devices

The interface devices that are used with this application are:

VCM Vehicle Communication Module: This device provides all link based functionality including: Data logger, Self test, Service Functions, Module Configuration and Programming, etc.

4. Supported languages: English, German, French, Italian, Spanish, Netherlands, Swedish, Danish, Norwegian, Portuguese, Slovak

5. Software version:

IDS: V73

JLR: V126

6. Special feature:

Ford VCM V73 can install IDS software and JLR software on one computer. Through the convert software, it can realize software conversion between IDS and JLR. Free update through internet.

Honda EPC v16.03

2.9 GB

Year: 2010

Version: 16.03

Developer: Honda

Platform: Windows 2000/XP/2003

Compatibility with Vista: unknown

Language: English only

Medicine: Present

Program HONDA EPC contains full information on spare parts for cars with the left and right-hand steering (except for the Japanese market), since 1982. Supplied on a DVD, installation takes ~ 30Mb, default program works by using DVD. The catalog contains information about cars from 1982 to 2011. The program has a search on VIN and its interpretation, the choice of model, Job-sheets, normo-hours and cost of spare parts, as well as user-friendly interface and high-quality illustrations.

Extras. Information: Before installing the program you want to remove all previous versions of the product, if any. Mount in any convenient way drive and install using a key.

To complete the installation on the HDD (work without DVD) you need to copy the disc to the hard drive and run the utility Switch Location specifying a new path to the data, or copy the entire contents of the DVD to the HDD and run setup from the HDD. If during the installation complains to the wrong drive, you must run the Registry Editor (regedit), find and delete the branch HKLM\SOFTWARE\HONDA.

IDS Land Rover/Jaguar v125.06 (Update 27.04.2011)

12.1GB

The Jaguar, Land Rover Integrated Diagnostic System (IDS) will be the only equipment that provides complete diagnostic coverage of current and future Jaguar, Land Rover vehicles. The IDS package replaces the Worldwide Diagnostic System (WDS). The IDS application will perform the identical functions of the WDS and allows dealership technicians to diagnose and service Jaguar, Land Rover vehicles. As the new diagnostic tool, IDS will be required to perform diagnostics on future model year vehicles. One IDS Package is recommended for each WDS in the dealership.

IDS is enhanced WDS software that was modified to run on a standard laptop platform, and utilizes the VCM and VMM. Moving IDS to a laptop helps technicians by integrating access to both diagnostics and service information on a single, powerful machine.

InstaCode 2008

173MB

InstaCode is considered the leading Key Data Software throughout the world. With over 3 billion key codes, and new codes added daily, InstaCode is a vital tool for any professional locksmith.

Compared to code books or any other code package, Instacode is a quick, easy to use program.

As lock and key technology constantly changes, so too does InstaCode constantly evolve to provide you the latest accurate information on; Codes, Cards, Transponders, Airbags, Car Opening techniques, ASP replacement products with most models featuring colour pictures of the ASP locks and service components.

InstaCode has been thoughtfully designed to easily take the user through 'windows' based pages. A comprehensive search engine takes you directly to the information you require. Even if you only have limited details, the program is smart enough to find all related keys that fit your search criteria.

A graphical layout displaying space & depth information, flat widths, angles, card number and other relevant key cutting information makes InstaCode easier to use than many alternatives.

InstaCode includes a web update feature, which periodically checks for updates, ensuring you always have access to the very latest version and newest code series available for the forthcoming year.

MAN WIS v1.3 01.2011
2.33 GB

Man WIS dealer service manuals for trucks and buses, Man. This program provides information on repair, maintenance, wiring diagrams Truck Man. Also in the program are presented and bus manufacturer Man. Catalog Man Wis Workshop Information System delivered on 1DVD disk full or partial installation of repair on the hard disk.

Excerpt from the program Man WIS (Workshop Information System):

This manual repair is an aid to the proper conduct of the repair work described here on the vehicles and units, and reflects the technical level at the time of the material in print.

In developing this guide assumes the existence of the professional qualifications required for working with vehicles and units.

Illustrations and corresponding descriptions are typical snapshots that do not always correspond to the repaired unit, while not incorrect. In such cases, planning and carrying out repair work is carried out expediently.

Repair of complicated additional units carried out our service department or the service department of the manufacturer. These aggregates in the text is a special instruction.

Repair works are classified by sections and subsections. Each subsection begins with page Background of the work. " Prerequisites for the works is a summary of the main conditions for the described repairs. Prerequisites for conducting the work can be followed by a detailed description of the work.

Map and Guide Professional 2011 v17.0 Europe City MULTILANGUAGE

5.75GB

Languages: Dutch, English, French, German, Italian

With Map & Guide PRO 2011 toll calculation is even more exact. You will always receive the current or forecasted charges valid on trip's specified departure date. Even in the event that toll rates are increased, new toll roads are introduced or new toll systems for Europe are discussed (including any draft bills put forward), this information is immediately made available to you through our updates.

Map & Guide PRO is Europe's leading truck route planner. This route planning software contains features and data catering specifically to the transport industry.

Reap benefits from:

- Truck-optimised route planning with truck routing (based on vehicle type) and integrated truck and hazardous goods data for Europe
- Precise distance calculation based on Map&Guide kilometres tha are recognized as a standard
- Calculation of exact transport costs including vehicle costs, diesel consumption (depending on uphill and downhill incline), toll, special toll and LSVA.
- Integrated CO2 emission calculation and compensation directly in the software - for your leap into green logistics
- Sequence optimisation and time slot optimisation of trips
- Scheduling and vehicle assignment planning that accounts for driving times and rest periods
- Visualisation and classification of customer data on the map for a better overview of your customer structure

Europe City includes: Germany, Austria, Switzerland, France, Belgium, Netherlands, Luxembourg, Liechtenstein, UK, Ireland, Poland Scandinavia, Spain, Portugal - includes corresponding city maps plus a map for the rest of Europe (main road coverage in towns and cities only).

Have today's calculations account for the toll fees charged from mid-2011 on German trunk roads, the Eco tax levied in France in 2013, the future truck toll in Poland or the toll increase in the Czech Republic in 2012. With our Map&Guide calc+ add-on module you can also create a detailed cost comparison: How much are the toll charges for my trips today and will they change in 6 months? The toll charges can also be individually defined for each country separately .

Mercedes WIS ASRA 01.2011

11.66GB

Mercedes Benz WIS EWA NET

The WIS net DaimlerChrysler AG's aim is to improve the electronic availability and usefulness of the workshop documentation (e.g. repair, maintenance, basic data, wiring diagrams and in part also documentation organization) of Mercedes-Benz and smart products by optimizing access and presentation. WIS net also offers integration to neighboring task areas such as e.g. definition of work units and flat rates using ASRA, and damage coding on one workstation.

The following criteria have been taken into consideration:

- Modern electronic information system to replace the microfilm and paper media.
- Faster document search and display. Mercedes Benz WIS EWA NET
- Simplification of document search in Mercedes Benz WIS EWA NET
- Simple system operation. in Mercedes Benz WIS EWA NET
- Access option to vehicle-specific data (vehicle datacard of EPC system).
- Vehicle-specific documentation finding. in Mercedes Benz WIS EWA NET
- Simplification of warranty settlement by integrating the damage coding in WIS.
- Documentation access using operation number in Mercedes Benz WIS EWA NET
- Definition of work units or flat rates using ASRA in Mercedes Benz WIS EWA NET

With the "Workshop Information System (WIS)" DaimlerChrysler AG aim is to improve the availability and usefulness of the workshop documentation (e.g. repair, maintenance, basic data, wiring diagrams and in part also documentation organization) of Mercedes-Benz products by optimizing access and presentation using the monitor as a medium. WIS (Mercedes EWA net EPC) also offers integration to neighboring task areas such as e.g. definition of work units and flat rates using ASRA, and damage coding on one workstation.

The system Mercedes Benz WIS EWA NET offers:

Increased productivity and speed during the documentation search and shorter waiting times for the workshop personnel accompanying this.
Operation using mouse or keyboard.
Automated documentation search.
Damage coding (for warranty settlement).
Call of the vehicle datacard from the EPC system with code identification written in full.
ASRA data, basis for creating orders, invoices and warranty applications.
Dynamic, vehicle-related generation of service sheets with an interface to ASRA.

Mercedes-Benz EPC EWA net 2012.04

6.66GB

Mercedes-Benz EPC EWA net, electronic spare parts catalogue consist original spare parts catalogue, all models cars, trucks, buses Mercedes-Benz, all markets, Smart & Maybach also including. Mercedes EPC net represents the latest development in EPC Flexible Publishing.

EPC net is available both online and offline.

All the functions available in EPC Flexible Publishing have been fully integrated into EPC net. The modern user interface applying standard Windows rules serves to significantly improve user guidance and navigation.

Modern user interface using standard Windows rules

Users will immediately note the modern user interface and the simple navigation using standard Windows rules.

You can open functions using the icons (a) or the Menu bar (b).

Tooltips are provided to explain icon functions (c). Hovering the mouse pointer over an icon causes the tooltip to appear with a description of the icon's function.

The combined pull-down menus (d) with input fields are available in EPC net for simple navigation within the catalogs/groups/subgroups.

You can use your mouse or keyboard to operate EPC net. Most of the keyboard shortcuts used in EPC Flexible Publishing are also used in EPC net.

For parts identification, EPC net requires at least a 6-digit model designation.

Ideally, parts identification should be done using a vehicle identification number so that the datacard can be used in the process. The datacard must be used when looking for parts that are color-specific or where the search depends on what equipment is installed in the vehicle.

Reduced number of windows

Functions that were spread over several windows in EPC Flexible Publishing have been condensed onto one window in EPC net.

The EPC net window is subdivided into the following sections:

Mercedes EPC net Picture

The picture has been supplemented with different zoom functions, and can be shown in a separate window using the icon.

Mercedes EPC net Parts list

All the part numbers for the entire subgroup are shown in the parts list.

Footnotes and code information (passenger cars), SA/component information (commercial vehicles) and construction kit information (BUS) can be displayed via links in a separate window.

Mercedes EPC net Shopping list

The contents of the shopping list (e.g. quantity) can be changed directly in the individual columns.

One important new feature is the "Show part context" function. When you reopen a saved shopping list you can click on the part designation in the form of a mouse-sensitive blue link to extract the part context directly from the shopping list. This saves you the trouble of reentering the vehicle data and the group/subgroup.

Mercedes EPC net List overview

The "List overview" can help the EPC net users with shopping list administration.

Saved shopping lists and a "temporary shopping list" can be used at the same time.

The icon can be used to create, show, delete, copy and print shopping lists.

The active area of the EPC net window is marked with a red frame.

You can change the size of the individual EPC net window areas via the respective dividing lines. Double-clicking on the dividing line between the picture and the parts list causes the picture to be arranged above the parts list.

The , and icons can be used to show/hide individual areas of the EPC net window and to individually change the column widths as required.

EPC net is available both online and offline

The various options at a glance:

Online server operation via Internet or intranet.

Local installation: offline operation for day-to-day use - updates via online downloads.

Offline mode: updates from DVD.

Advantages of spare parts catalogue Mercedes-Benz in EWA net interface.

Mercedes WIS-EPC 04.2011 Full Version

17.5GB

Components Engine allows to publish your spare parts catalogs (or EPC: Electronic Parts Catalog) directly onto the worldwide web, viewing such as posted catalogs is called "online browsing". The creation of the pages and files, which will then be hosted by the server for publication, is fully automatic. A simple browser (such as Internet Explorer) will allow you to browse the online catalogs created by Components Engine, without any need to install any extra plug-ins. The on-line spare parts catalog is fully interactive and it enables to fill out

the order of the selected parts .

Mercedes-Benz EPC EWA net, electronic spare parts catalogue consist original spare parts catalogue, all models cars, trucks, buses Mercedes-Benz, all markets, Smart & Maybach also including. While WIS is an application repair all Mercedes-Benz cars. Mercedes EPC net represents the latest development in EPC Flexible Publishing .

MICROCAT Ford Europe 08.2010

5.25GB

Catalog:

DELETED

MICROCAT Ford Europe 05.2011

5.72 GB

Electronic parts catalog for Ford European assembly. Provides information on passenger and light commercial vehicles. With the full installation (program + data) takes about 4,3 GB. Rolling back the date is not required (working without a rollback to May 2011). Completely reworked the distribution, simply run setup.exe and specify the installation path. Tablets are not required. Whereas previously there were previous versions MICROCAT Ford, do not forget to remove them before installing, otherwise you may experience problems with the definition of the current directory with a database (the program at startup through all logical drives (except for Z:) and look for a folder FEU_DATA, as well as zero-length file in mc1234 root directory).

Catalog (24):

DELETED

Microcat Hyundai 03.2011-04.2011

7.2 GB

Electronic parts catalog Hyundai. Of all models produced and / or produced Hyundai Motor Company, are divided into groups (cars, SUV / minivans / vans, commercial) and by region. The catalog can identify the vehicle by VIN (filtering part number), the search for the name of spare parts (partial or complete), original number, and also shows the applicability of parts. There is a list of options with a transcript that facilitates selection of the right numbers in the absence of VIN-filter.

Language is possible separately for the program interface, and separately for items of spare parts.

Catalog (30):

Mitchell OnDemand + Estimator 1Q 2011

78.46 GB

Mitchell 1 OnDemand5.com is the end product of repair information that has been collected across the past eight decades and presented to our customers in a consistent, easy-to-use format. OnDemand5.com includes Diagnostics, Repair Information, TSBs, Recalls, Maintenance Requirements, Parts Prices, Labor Times, Vintage Information, Fluid Types and Volumes that have been reproduced directly from the Original Equipment Manufacturers (OEM) published works. All this information is then combined to create the aftermarket industry's best Wiring Diagrams, Users Tips, and Shortcuts that make up Mitchell 1's OnDemand5.com.

OnDemand5.com Features:

CircuitSelect - Pinpoint and diagnose electrical problems faster than ever with Mitchell 1 CircuitSelect. The power of CircuitSelect allows you to highlight and isolate the wires important to your diagnosis and also enables you to hide the wires you don't want to see, giving you the ability to simplify even the most complex problems.

Technical Service Bulletins (TSB) - Over 200 TSB's and recalls are added to OnDemand5.com every month. Use the time-saving search function to quickly find a relevant TSB or use the filter tool to narrow your search.

Vintage Information - Every subscriber has access to vintage information, giving you engine mechanical articles, engine performance articles, and wiring diagrams back to 1960.

Oil Circuit Diagrams - Mitchell 1's full-color oil circuit transmission diagrams provide consistency, clarity, and an easy-to-read format.

Labor Times and Parts Pricing for 1974 - Current domestic and imported vehicle models are included, giving service advisors a huge vehicle selection to produce more estimates.

OEM Part Numbers - OEM part numbers are included with detailed illustrations and manufacturer suggested retail prices (MSRP).

OEM Scheduled Maintenance Services - Presented in time and mileage intervals, as well as services based on dashboard indicator lights. For quick reference, the maintenance data includes fluid capacities that are broken out separately.

Links (200):

Mitchell OnDemand Transmission

1.29GB

Transmission is a computerized system for the retrieval of repair and TSB information. Transmission provides access to Mitchell's world-class database of vehicle repair information and graphics Mitchell OnDemand Transmission gives you a comprehensive database of automatic and manual transmission information complete with Mitchell's full-color oil circuit diagrams redrawn from factory specifications. You'll appreciate the consistency, clarity and easy-to-read format.

Our wiring diagrams are converted from factory schematics into formatted, consistently-clear diagrams with added features such as component and ground locations, pin numbers, switch internals and power distribution identification. When used in combination with the diagnostic charts, these service "maps" make troubleshooting and testing faster and easier than ever. And since not all shifting symptoms are directly related to the transmission, OnDemand Transmission covers electronic and component locations and drive axles, as well as clutch and transmission. Valuable service bulletins are also included.

Catalog (14):

MUT-3 Mitsubishi Diagnostic Car Software PRE10031-00

698 MB

In accordance with releasing new products that introduce CAN communications systems, MMC has developed the MUT-III as a next generation diagnosis tester for servicing these new and future vehicles.

A personal computer (PC) is connected to the MUTIII unit and used as a system's control terminal, and communicates with a vehicle ECU through the VCI. In addition to being able to handle all diagnosis functions covered by the conventional MUT-II tester, the MUT-III system can display data as easy-to-understand diagrams and graphs on a large screen of the PC. Unlike the MUT-II, the MUT-III can retain data on all vehicles, from old to new models, classified according to destination in the PC's hard disk. This eliminates the awkward but essential job with the MUT-II, of switching the data list (communications protocol data and diagnosis item list database) by replacing the ROM pack with another according to the vehicle model and year model.

New functions that make use of the advantages of the PC are also being developed. For example, the workshop manual viewer is a useful function for mechanics as they no longer have to carry around a thick manual and search for relevant pages while working on a vehicle. The workshop manual viewer is currently available for certain vehicle models, and allows users to retrieve the pages containing the failure code for a particular problem at the push of a button.

MUT-3 PC software application supports following languages: English, Czech, French, German, Greek, Italian, Spanish, Turkish, Russian.

Set Includes:

(1) Vehicle Communication Interface (V.C.I.) (MB991824)

A communication interface used to connect the vehicle ECUs and the PC.

1. When connected with the PC

- Vehicle diagnosis (Interactive fault diagnosis)
- SWS communication; CAN communication support

- Drive recorder
- Volt, Ohm, measurement
- Fuel pressure measurement (Not available in US)

2. When used with the V.C.I. unit (disconnected from PC)

- V.C.I. Stand-alone diagnosis
- Drive recorder
- ECU reprogramming
- Volt, Ohm measurement
- Belt Tension measurement

(2) Memory Card

Stores data for ECU reprogramming, drive recorder, etc.

This is a standard, off-the-shelf memory card. The one provided (with reprogramming data) is a Compact Flash memory card (MB991853) inserted into the CF card adapter (MB991939).

(3) M.U.T.-III Main Harness A (MB991910)

Used when connecting the V.C.I. with vehicles that have only one 16-pin diagnosis connector.

- Supports fault diagnosis and ECU updating on the above-described vehicles
- Supports the CAN communication system

(4) M.U.T.-III Main Harness B (MB991911)

Used when connecting V.C.I. with vehicles that have a 16-pin + 12-pin or 16-pin + 13-pin diagnosis connector.

For models equipped with only 12-pin (or 12-pin + 12-pin) diagnosis connector, connect the M.U.T.-II adapter harness (MB991498) to the end of this harness in the same as M.U.T.-II, and power is supplied from the cigarette lighter socket.

Nissan Fast EPC 01/2011

1.50GB

Quote: Spare parts catalogue Nissan contains the catalogue of details for all models Nissan of European market.

In the catalogue Nissan the information on spare parts of cars Nissan of the released for European, Asian, American, Canadian, Japanese markets, including Infiniti is presented.

The electronic catalogue of spare parts Nissan Fast for Windows contains the catalogue of details for all models Nissan. The catalogue of spare parts Nissan Fast consists from 10CD: EL1, EL2, ER, GL1, GL2, GR, USA1, USA2, USA3 (Infiniti), Canada. The part of machines and microbuses of firm Nissan issued in Spain, are on disk Nissan Spain (Spain), it is the separate program with other mantle (does not enter into complete set Nissan ALL). Cars and microbuses of firm Nissan with the right arrangement of a rudder issued for the Japanese market, are on disks Nissan Japan, the mantle of the program is similar Nissan Fast, only all names of details are executed in the Japanese language. Check versions of components the given complete set of programs on a site. To orient in necessary disks, the mentioned below table will help.

The identifier of the manufacturer in Vin (first three symbols Vin)

- JN1 cars made in Japan
- VSK cars made in Spain (NMISA)
- SJN cars made in England (NMUK)

- JNK cars made Infinity in Japan
- JN6 lorries and minibuses made in Japan for the USA and Canada
- JN8 multipurpose cars (minivans, jeeps) made in Japan for the USA and Canada
- 1N4 cars made in the USA (NMM)
- 1N6 lorries and minibuses made in the USA (NMM)

Since 03.2000, on disks goes simultaneously three versions of the program (DOS, WIN 16-bit, WIN 32-bit). At work from CD program NISSAN FAST for Windows will borrow{occupy} 12Mb on the winchester, at full installation{refitting} of all disks the program will borrow{occupy} 3,2Gb. Except for search of spare parts the program contains the utility for an estimation of damage after crash (the list of spare parts a subject replacement), and also the program of search of applicability of a detail and search of replacements.

The list of "fast" keys duplicating buttons on the panel of the program.

- F2 the basic window of indexes of groups of spare parts
- F3 transition to figure under number of section (SEC)
- F4 search of figure under number and the name of section (SEC)
- F5 translation of number of a detail in figure in original number of a detail
- F6 a press{seal}
- F7 search of a detail or figure under the name
- F9 a note
- F12 clearing of the screen
- F11 an estimation of damage from crash

To change color of a background at illustrations in the program, it is enough to press the button "*" on the right block of keys of the keyboard.

Ext. Information: Installation must be done:

1. On any disk folder FASTPRG \ Win2000 \ Setup
 2. On drive C \ (D, E, G) where you originally pointed the way to the folder Nissan create additional folders \ EL. US. IN. EL_INF
 3. In each folder to unpack the images; EL-EL_01-2011 and so on
 4. Next, locate the file C:\Nissan\nfset.exe and run Tab CD-ROM setup
- Prescribe the way separately to each folder (C:\Nissan\EL, C:\Nissan\EL_Inf, C:\Nissan\Us)
5. Create a shortcut to Desktop from: \NISSAN\Nfmenu.exe
 6. Everything works

OBD II SCAN PROGRAMS

749MB

This is a collection of O.B.D. Programs that I have collected over the last few months. Follow any install instructions if included and disconnect from internet during installation.

List of included programs:

- EFI LIVE v.4.6.5, v.7.5.4, and v.7.5.5
- INNOVA 1003c Program
- OBD Diagnostincs, Inc. CD
- OBD Wiz
- ProScan v.5.6 and v.5.7 with Keygen
- ScanMaster ELM v.1.6 and v.2.0.7 (both by AXIM)
- Snap-On MT2500 Updates
- AutoEnginuty ScanTool v.6.0.2
- Carsoft BMW v.6.5
- Carsoft Mercedes Benz v.7.4
- DDT2000 Renault v.2.0.9.0
- Diagnose v.4.1
- DigiMoto v.4.03
- ECM2001 v.3.2
- Finalist v.1.0
- FordScan v.2.02
- Galleto OBD2
- INPA v.5.0
- KWP2000
- OBDTool v.1.2.60
- OP-Tech2
- PCMscan v.2.4.5.824
- TachSoft Mileage Calculator v.1.2

Different Programs have different features, and not all of them will work with every scanner cable. ProScan and ScanMaster ELM work with knock-off OBD Chipsets (ELM327) and with the official ScanTool.net OBDlink tool.

Opel - Vauxhall GlobalTIS v27.0 B Multilanguage

7.9 GB

TIS2Web is a Technical Information System which is provided via Internet Explorer and provides assistance to both privately owned workshops and fleet customers on the technically correct repair and maintenance of Opel vehicles. You have direct access to the extensive

information provided by Opel, direct and at first hand. The sections below give you an initial overview, a few extracts of the types of service information available and a table of the vehicles which are described in the TIS2Web System.

Hardware Requirements

We keep a wide range of data available in TIS2Web in the form of texts and graphics. To ensure that these data are transferred to you at the best possible speed, TIS2Web is hosted in a particularly high performance central server environment. However, the actual transmission rate is equally dependent on the local system environment such as e.g. the Internet connection and the Internet Service Provider.

To ensure that TIS2Web provides the best possible service and meets your expectations, we recommend the following system requirements for your PC and Internet access.

Hardware:

- Processor: Intel Pentium 1.5 GHz
- System Memory (RAM): 512 MB for document view application; 1GB for diagnostic and re-programming
- Hard Disk: 40GB Hard Disk
- Interfaces: USB 2.0 , Serial, VGAMonitor: 17 inch monitor
- Internet access: DSL High Speed

Software:

- Microsoft Windows operating system, from Windows 2000 Professional, Windows XP (SP2)
- Microsoft Internet Explorer from version 5.x, 6.x or 7.x

Graphics:

- Basic mode: 800x600 Pixel / 256 colours
- Expanded mode: 1024x768 Pixel / 65636 colours

Perkins EST 2010B

148MB

Perkins EST 2010B description of the software: Perkins EST dealer diagnostic tool Perkins engines.

EST is comprised of a hardware and software (The Integrated Parts and Service System or δ TIPSS δ) interface kit, which a user can use to communicate with Perkins' 2300/2800 electronic engines (FG Wilson 300 l' 750 KVA range) and FG Wilson Powerwizard control panels. This communication is established via a J1939 data link. All in all, the EST interface kit provides the user with an effective tool in diagnosing engine problems and the ability of configuring system parameters.

EST enables the user to:

- Override Powerwizard level three passwords
- Configure and/or change system parameters
- Display, graph and record logs of parameter status
- Display the status of a group of parameters (temperatures, pressures, etc)
- View and clear active and logged diagnostic codes
- View and clear active and logged event codes
- Display, view or change the current Configuration File or Base level Flash File
- Upload, download and save configuration files
- View a list of irregularities logged by the ECM (engine control module)
- Perform diagnostic tests
- Perform calibrations
- Print reports and diagnostic results.

Why should an FG Wilson dealer invest in the Electronic Service Tool?

It provides the technician with an essential tool by facilitating the troubleshooting of electronic engines. δ As a matter of opinion, troubleshooting an electronic engine without EST is like troubleshooting an electrical panel without a multimeter δ l' Alex Cabrices FGW Latin America Caribbean Service Advisor

Essential in replacing an ECM on a Perkins' 2300/2800 series engine. A blank ECM can only be configured using EST.

Essential in replacing or retrofitting an FG Wilson Powerwizard control panel module - the new standard in FG Wilson control systems. A blank module can only be configured using EST (installing the base flash file into a blank Powerwizard module).

Enables the dealer to upload, download and save customer configuration files.

Allows bypassing Powerwizard level three passwords.

Enables dealers to update the software versions of customer's Powerwizard control panels, as required. New software releases can enhance the control panels functionality.

Enables dealers to install additional Powerwizard language files, as required.

What special tools or equipment do I need?

You will need a laptop computer with either a USB or serial port and Windows 2000 or XP. Please keep in mind that EST is fairly demanding on the CPU; hence, the slower the processor, the slower the program will run.

RENAULT Clip v113 09.2011 Multilanguage

1.86GB

Renault CLIP - the latest diagnostic tool from Renault. It contains all the latest diagnostic technology and information base to address all issues.

Extras. Info: If the primary installation, follow the instructions, which is attached. If you already have an earlier version, it is recommended to uninstall and then follow the installation instructions. It only works with original CLIP adapter or with a Chinese clone, no adapters and KL KKL is not supported.

Renault has developed a diagnosis system called Valise Clip. Hooked up to the car through OBD2 connector, it runs a complete test automatically, checking a series of parameters and identifying problems that can then be solved. Program dealer car diagnostics Renault, Dacia, Samsung.

FULL Instructions : Before installing please do the following steps: 1. Uninstall previous version of Renault CAN-Clip if you have 2. IF your 1st installation: Run Crack.reg

After installation finish & you will reboot, you will get SPX Registration.... To avoid PERMANENTLY this, do the following steps: 1. Alt+Ctrl+Del (Kill process RSRWin.exe) 2. Delete RSRWin.exe (in C:\Windows) 3. Use Regedit (and Delete "ALL" values with name RSRWin) 4. Reboot your machine!!! 5. NO MORE flash for SPX Registration...

Before your 1st Running with the program make those steps: You NEED to have 1 Renault Car (and ALWAYS Renault clip running-working) when you have Renault Car!!! 1. Connect your Clip Sonde Can Interface 1st in your Car (OBD Slot) 2. Turn Ignition ON (NOT Engine running) 3. Connect your Clip Sonde Can Interface via USB cable with your computer 4. Start to installing ALL the Drivers (that they will be appearing) and you can find those in: C:\WINDOWS\system32\drivers or from this DVD in the folder "CAN-Clip Drivers". 5. You must INSTALL 4 Drivers (4 TIMES the same thing) After you finish, you can RUN now finally your CAN-Clip Software.

Tolerance Data 2009.2

3.55 GB

With Tolerance Data installed on your PC you are well equipped to carry out repairs, service and fault finding on your customers' vehicles. With current version 2009.1, Tolerance Data offers workshops even more technical repair and diagnostic data for trucks, vans and passenger vehicles.

Update facts: Service data and technical specifications on more than 6500 vehicles - news are: Alfa 159, Audi A4, BMW 3 series, Citroen C3 II, Citroen C5 III, Citroen Berlingo, Mazda 2, Mazda 6, Opel Zafira, Peugeot 308, Peugeot Partner, Renault Kangoo, Renault Laguna III, Volvo V70...and many more.

More than 5000 wiring diagrams - on: Alfa 147, BMW 1 series, Ford C-Max, Ford Focus, Kia Sorento, Mazda 6, Mercedes A-Class, Mercedes Vito, Opel Astra H, Seat Leon, Toyota Corolla and many, many more.

Aprox. 350 CAN-BUS diagrams with explanations on virous system. Many new pictures of engine compartment and component location. Pictures of alignment points. Easy overview of P- and U- engine codes on newer models (from year 2000)

Vehicles:

The various modules are available in 3 different packages:

CD PK1 - Package 1 contains:

- Technical data
- Service schedules

CD PKEL Package Electronic contains:

- Wiring diagrams
- Engine management
- ABS
- Air Condition
- Airbag

CD PK3 Package 3 contains:

- Technical data
- Service schedules
- Repair times
- Wiring diagrams
- Engine management
- ABS
- Air Condition
- Airbag

Trucks:

CD PKLV - Package Trucks contains:

- Technical data
- Service schedules
- ABS
- Engine management

Advantages of Tolerance Data:

- Wiring diagrams for all systems
- Detailed fault searching data
- Component descriptions
- Air condition fault searching
- Placement pictures of fuses/relays
- Market adapted service schedules
- Reparation times
- Directions for exchange of transmission belt

VAS 5054a

VAS 5054a is Bluetooth version.

VAS 5054A is a professional diagnostic tool for VW, Audi, Seat, Skoda. VAS 5054a supported functions vas 5054a read and erase ECU fault codes, including Check Engine, ABS, SRS, transmission system, Radio, heating. ect. Turn the check engine light off. The VAS 5054A is a universal diagnostic interface for the vehicles of the Volkswagen Group and all OBD vehicle systems from other manufacturers.

The integrated Bluetooth interface connects the vehicle with a notebook, desktop PC or test system. No cables are needed for vehicle diagnostics using the VAS 5054A.

The range of the wireless Bluetooth connection is 5 to 10 meters, depending on the environment and the type of Bluetooth adapter used on the PC side. The Serial Port Profile (SPP) is used for data transfer via Bluetooth. Different Bluetooth security levels are supported.

The vehicle protocols are handled directly in the VAS 5054A.

This ensures fast response times and a reliable real-time behavior independently of the PC operating system. Every time a connection is established, the VAS 5054A software is identified with the version installed on the application PC. The VAS 5054A thus automatically adopts a new features provided after a new software version has been installed on the application PC.

The diagnostic application and the associated Diagnostic Base System are installed on the application PC.

The diagnostic base system can access the VAS 5054A via Bluetooth or USB.

Access via Bluetooth: After a connection to the VAS 5054A has been set up, the Bluetooth software provides a virtual serial COM port (Bluetooth Serial Port Profile). The Diagnostic Base System uses this COM port to communicate with the VAS 5054A. You need to specify this port when you install the diagnostic application.

Access via USB: You can also connect the VAS 5054A to the application PC by using the supplied USB cable. Windows detects the VAS 5054A through Plug and Play, and automatically installs the drivers copied when you installed the diagnostic application. Setup of the VAS 5054A is then complete and the device is ready for use by the diagnostic application.

VAS 5054a language available: English/Spanish/Germany/French

The following vehicle bus systems are supported:

K line (ISO9141-2)
High-speed CAN (ISO 11898-2)
Low-speed CAN (ISO 11898-3)
J1850 (SAE J1850)

51MB

From 25.02.2011 at distribution there is a base KERNEL + updates from No.1 to updates No.14 (that in the sum gives 464.997 VIN) + vin decoder.

To adjust ETKA 7.0 and 7.2 for work in an offline a mode:

Before to adjust ETKA preliminary copy contents of folder FGST in any place convenient for you.

Folder FGST is either here disk:\VAG\USERDATA\or here disk:\ETKA\USERDATA\FGST\.

C:\VAG\USERDATA\FGST\ or C:\ETKA\USERDATA\FGST\ - put all VINs from base to this folder.

During customer inquiry if his VIN is already in your VINs folder it will cut-off by VIN.

All files added to folder C:\VAG\USERDATA\FGST\ or C:\ETKA\USERDATA\FGST\ should be "READ ONLY"!

Adjustment order:

1: Start ETKA. You will see four windows - VW, SEAT, SKODA, AUDI.

2: With one click of mouse select VW window to blue frame.

3: Choose section UTILITIES (under windows)

4: Choose section "ini-EDITOR".

5: In section "INTERNET" choose "identification of auto".

6: Put cross in window "PATH". (it should be path C:\VAG\USERDATA\FGST\ or C:\ETKA\USERDATA\FGST\)

7: Remove cross from window "get chassis number from Internet".

8: Press SAVE button.

9: Make the same procedure for SEAT, SKODA, AUDI windows.

10: Restart ETKA.

11: Take any of VINs from C:\VAG\USERDATA\FGST\ or C:\ETKA\USERDATA\FGST\ and check it for cut-off

12: If it was cut off it means that program is working.

13: To avoid mistakes and misunderstandings ALWAYS (if applicable) MATCH TOGETHER your data with real data of auto .

In folder C:\VAG\USERDATA\FGST\ or C:\ETKA\USERDATA\FGST\ select all files by pressing ctrl+a, Press mouse right button and choose "Properties" then select READ ONLY. After archive all the files from folder and send it to above mentioned addresses .

Vivid WorkshopData ATI v11.2 Release 2011 Q2 Final

WorkshopData ATI is our new information product available on CD and DVD. It is based on Vivid's technical database, the most extensive repertory of car data in Europe. Vivid WorkshopData provides technical information on cars and light commercial vehicles, e.g. essential maintenance and repair information, adjustment data, technical drawings and engine management data. Extra modules are: Wiring diagrams (comfort electronics) and Repair Times. Its content is second to none.

YEAR: 2011

Release Version: Vivid Workshop: 2011-Q2

Compatibility with XP / Vista / 7: yes

Language: Multilanguage

Size: 2.96 Gb

WHAT'S NEW:

Electronics Smart Assistant

Automotive electronic technology is developing rapidly. To diagnose faults accurately, the automotive technician now needs detailed information on complex electronic processors (ECU's) and their associated components. A single diagram displayed on a PC is no longer enough.

Designed specifically for the diagnosis and repair of modern vehicle electronic systems, the Electronics Smart Assistant will change the way the automotive aftermarket views car electronics and diagnostics. The Smart Assistant is easy to use. You can either enter EOBD codes or go straight to an electronic component. Clear, step-by-step instructions then lead you to an accurate diagnosis.

OUR DATABASE CONTAINS THOUSANDS OF STANDARD P-CODES, MANUFACTURERS' FAULT CODES, AND DETAILED WIRING DIAGRAMS, MAKING THE DIAGNOSTIC PROCESS QUICK AND EASY. THE ELECTRONICS SMART ASSISTANT IS AVAILABLE EITHER INTEGRATED WITHIN THE APPLICATION OR AS A STAND-ALONE MODULE.

Volvo Vida 2010C

8.69GB

DiCE--Diagnostic Communication Equipment, is a tool that is used together with VIDA all-in-one to communicate with the vehicle.

Communication makes diagnosing and troubleshooting the vehicle possible, as well as downloading software. Dice has an integrated CARB cable, which is connected to the vehicle's diagnostic socket. When connecting to the vehicle, DiCE is powered as long as the battery is charged. DiCE has a folding hook that is designed for hanging the unit from one of the grab handles in the vehicle for example. DiCE is equipped with four status LEDs that indicate the status of the software, the USB and Bluetooth communication and the interface to the car. At one end of the unit, there is a DC input where a battery cable or adaptor(12V) can be connected. The adaptor is used when upgrading and troubleshooting the DiCE. In the other end of the unit, there is a removable cover that could be removed by turning the screw on the cover.

Volvo VIDA2011 -A Final

7.42 GB

Original factory software for Volvo vehicles. Replaces old Volvo Vadis. It contains detailed service and repair manuals and electronic spare part catalogues. Also there is a search by VIN number.

1. VIDA (Vehicle Information & Diagnostics for Aftersales) and contains service manuals, electronic parts catalogs, service bulletins, fault tracing and onboard diagnostics. Volvo 1982-2010 models.
2. VOLVO ELECTRONIC WIRING DIAGRAM for all the models 2005-2010

VIDA is compatible with Windows XP Pro.

EWD can run either installed or directly from the DVD so can be used on XP, Vista or Windows 7

Both DVDs are in English

VIDA can be run standalone on the computer as a service/parts manual or can be hooked-up to the car with VCT2000. DICE or J2534 and used as a diagnosis tool

VCT2000 or DICE are not included in the auction

No internet connection is needed - everything runs from your computer.

These are the DVDs used by the dealers

VIDA is the only comprehensive, single source of service information and specifications available specifically for Volvo. The aim throughout this manual has been simplicity, clarity and completeness, with practical explanations, step-by-step procedures, and accurate specifications. Whether you're a professional or a do-it-yourself owner, this DVD will help you understand, care for, and repair your car. Crystal clear pictures and diagrams with step by step instructions. Bid with confidence - This is the only DVD used by professional technicians to fix your car - not an aftermarket manual.

WinOLS 1.500 + modules (damos) + cracks

153MB

Based on experience gathered with the DOS version of the OLS software a new Windows based program has been developed which continues to provide the user interface that was introduced by its predecessor, so switching to the new version is made easy.

Overview:

- Additional features include improved functionality as well as an extended range of display modes.
- Existing hardware like the OLS200 simulator module and the MP2440(P) EPROM programmer are being supported even when using Windows XP / Vista.
- You can select either English or German as the interface language and switch between these.
- The concept of the integrated checksum correction has been kept up. By using DLL files the algorithms were moved out of the main program and thus are independent of the version used.
- Functions to search for maps and to put them down on the map list makes efficient working a lot easier.
- The display of raw data takes place in 2D graphic or hex/decimal dump.
- Maps can be shown as 3D/2D chart or as a table.
- A 3D preview window makes it easier to find maps

Im- and export of binary files, Intel and Motorola-Hexfiles. All types can be zipped, coded and have swapped lines or be sent directly by mail.
